

### General features

- 4 profiles roasting (light, normal, medium, dark) Customizable
- 1 START button to start the process of preheating and roasting
- 1 ON / OFF button to power on / power off
- Cooling system is activated automatically when toasted

### Dimensions

Height: 650 mm  
 Width: 560 mm  
 Depth: 630 mm  
 Weight: 70 kg

### Characteristics

- Roasting system patented
- Heat generator on electrical resistance
- Panel selection of roasting programs
- Safety device for switching off the electrical resistance
- Capacity of roasting drum 1 Kg
- Rotation of the roasting drum with gearmotor
- Electric fan for the roasting drum
- Auto cooling system
- Pellicoliere with removable container
- Acoustic signal at the end of roasting

### Installed power

- 220 Volt single phase
- 3200 Watt

### Colors available

-  Silver
-  White
-  Black
-  Red

### Optional

-  Chrome
-  Gold
-  On demand
